Period for	The MAILING DATE of this communication app Reply	pears on the cover sheet with the c	orrespondence address		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,180,265 (Erickson) in view of US 6,445,069 (Ling). Erickson teaches aluminum connection site (figure 3, item 12); a nickel layer on the aluminum connection site contacting the top surface (figure 3, item 24); a copper layer atop and in contact with the nickel layer (figure 3, item 22) and a solder ball contacting the copper layer forming a bond (figure 3, item 26). Ling teaches the interchangeability of pad material between aluminum and copper prior to plating with nickel (col. 4, 11, 35-45). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the pad material to utilize copper in order to provide better thermal conductivity (see Ling col. 1, ll. 5-15). With respect to the claimed copper layer thickness, it is the examiner's position that it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the thickness of the copper layer to the claimed range in order to provide a suitable copper wetting layer for the solder (see Erickson col. 4, 1l. 10-25). Alternatively, Erickson teaches using copper and nickel to perform a particular task. It would have been obvious to one of ordinary skill in the art at the time of the invention to choose the instantly claimed ranges through process optimization, since it has been held that there the

Art Unit: 1725

general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. See <u>In re Boesch</u>, 205 USPQ 215 (CCPA 1980).

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over 6,180,265 (Erickson) and US 6,445,069 (Ling) as applied to claim 32 above, and further in view of US 6,452,270 (Huang). Huang teaches the use of a pb/sn solder (coll. 4, ll. 10-25). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the combined invention of Erickson and Ling to utilize the pb/sn solder in order to effectively form a bond to the semiconductor device (see Huang col. 4, ll. 1-20). It is the examiner's position that since the prior art uses substantially the same metal layers coupled with substantially the same solder (i.e., tin based solder) as in the instant application, the particular CuSn will necessarily be present. When the examiner has reason to believe that functional language asserted to be critical for establishing novelty in claimed subject matter may, in fact may be a characteristic of the prior art, the burden of proof is shifted to the applicant to prove that the subject matter shown in the prior art does not possess the characteristics relied upon. *In re Fitzgerald et al.* 205 USPQ 594.

## Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/679,787

Art Unit: 1725

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Johnson whose telephone number is 571-272-1177. The examiner can normally be reached on M-Th 7:30 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Pat Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
